

WALL WASHER SHIELD XB-36

High performance in demanding climates

IP66-rated, the Wall Washer Shield XB-36 is the optimal high brightness fixture for all outdoor large scale installations in areas with demanding climates. Unlike conventional products, the Wall Washer Shield XB-36 is extremely resistant against strong water jets and temperature variations. The highly reliable heat dissipation mechanism ensures an improved operating temperature range from -20°C up to 60°C, leading to higher stability and longer LED lifetime. A built-in heat sensor provides additional thermal safety, which will automatically reduce the light output if the temperature limit is exceeded. Outstanding design and new technology provide users high flexibility to choose different color combinations: RGB, monochrome or any other customized color. A wide range of available optics ensures amazing colorful illumination of even the largest and most demanding outdoor surfaces.
